RELEVANT PROJECTS

Fitness Mobile App: iFitness

Tech Stack: React Native, Expo, TypeScript, Java, Spring Boot, Spring Security, MySQL, Heroku

- Designed user interfaces and features by using Figma
- Implemented features that allows users to set/track their daily macros and weight goals, while also allowing them to log their daily exercises. Users can also search for exercises from data that is fetched from 3rd party API.
- Created custom authentication security configuration by using asymmetric keys to encrypt JSON web token

Social Media Web Application: FlashGram

Tech Stack: React, Redux, Material UI, MongoDB, Express, Node.js, Heroku

- Full stack social media web application that allows users to create/edit/delete image posts.
- Optimized Redux store state to minimize the number of fetch calls and loading times
- Implemented JSON web token for authentication and authorization and configured BCrypt to hash user's password

Artificial Intelligence Prompt Responder: AI Ask Me

Tech Stack: React, Node.js, Heroku, OpenAI API

- An application that allows user to enter a prompt and get a response back from an artificial intelligence
- Requesting data from OpenAI API with user prompt that allows an artificial intelligence to response back

EDUCATION

Generation USA

Washington, DC

Full Stack Java Developer

Gwinnett Technical College

Lawrenceville, GA

Completed coursework towards AS Business Technology
